[Portfolio link ↗](#)

[Leetcode link ↗](#)

## PROJECTS

### [Developed APIs with Node.js and Express.js for Shoppyglobe ↗](#)

Feb 2025 - Mar 2025

- Designed and implemented RESTful APIs using Node.js and Express.js for seamless backend integration.
- Utilized MongoDB for efficient data storage and retrieval, ensuring smooth interaction between the front end and back end.

### [ShoppyGlobe E-commerce Application ↗](#)

Feb 2025

- Developed a fully operational e-commerce platform with React and Redux.
- Integrated API for dynamic product data updates.
- Optimized performance and responsiveness across devices.

### [Weather Forecast Application ↗](#)

Nov 2024 - Dec 2024

- Built a real-time weather application with a user-friendly interface.
- Integrated asynchronous API requests to fetch and display weather data dynamically.
- Designed a responsive layout for accessibility across different devices.

### **GridStar**

Feb 2022 - Jul 2024

This is related to HVDC plants and the UI Integrated to the relative hardware nodes and data bindings and vector generators and the whole calculations are done from UI and included API calls, backend formulas to convert the exact things in the calculations.

### **SKILLS**

- |                           |                   |                   |
|---------------------------|-------------------|-------------------|
| • JavaScript              | • HTML            | • Git             |
| • React                   | • Tailwind CSS    | • Node.js         |
| • MongoDB                 | • Redux           | • Problem Solving |
| • Effective Communication | • Time Management | • Decision making |

### [Developed YouTube-Inspired Platform ↗](#)

Mar 2025

- Built a YouTube clone with features like video uploads and user authentication.
- Implemented JWT for secure authentication and session management.
- Added search, subscriptions, and personalized recommendations.

### [NetFlixGPT ↗](#)

Jan 2025

- User Authentication: Secure Sign In and Sign-up functionalities using Firebase.
- Responsive Design: Built with Tailwind CSS for a seamless user experience.
- Movie Database Integration: Fetches movie details from The Movie Database.

### [Food Order Application ↗](#)

Jun 2024 - Sep 2024

- Shimmer effect on UI to indicate when data is loading
- Sorting of restaurants based on different criteria
- Fetch API used to get real time data using Swiggy API
